

Your Digital Front Door for Engaging Patients

Patient Portal

**Healthy
Outcomes®**
Platform for Patient Engagement

Open the Door to Exceptional Engagement

Today's patients and healthcare consumers know what they want from their healthcare providers. When it comes to patient portals, they expect a user experience consistent with consumer applications they use on a daily basis. Not an unappealing portal that doesn't warrant their time or consideration.

Patients expect their portal to be the portfolio manager for their (and their family's) healthcare. They want a smart solution that brings together all their healthcare activity into one convenient, simple-to-use patient portal.

Orchestrated Engagement

The solutions on our Healthy Outcomes platform work in unison to orchestrate a holistic approach to engagement that results in a healthier, happier patient.

Why Our Patient Portal?

Modern Patient Portal Experience

Make the right first impression with patients and healthcare consumers. Deliver an appealing, well-designed patient experience that's constantly updated to reflect today's consumer use trends.

Patients' Healthcare Hub

Patients want a portal to streamline and organize their healthcare activity. Our Patient Portal provides this by bringing together all forms, surveys, reminders, alerts, and their entire clinical record.

Patient Engagement Platform

Exceptional patient portals aren't standalone solutions – they effortlessly communicate with your other engagement solutions such as intake and check-in, reminders, patient surveys and PROs, online scheduling and population health.

Engagement for Multiple Systems

Patients don't want multiple portal solutions across their health system. We have extensive API integration with more EHRs than any other patient engagement solution. Now patients can have a single portal solution for all their providers.

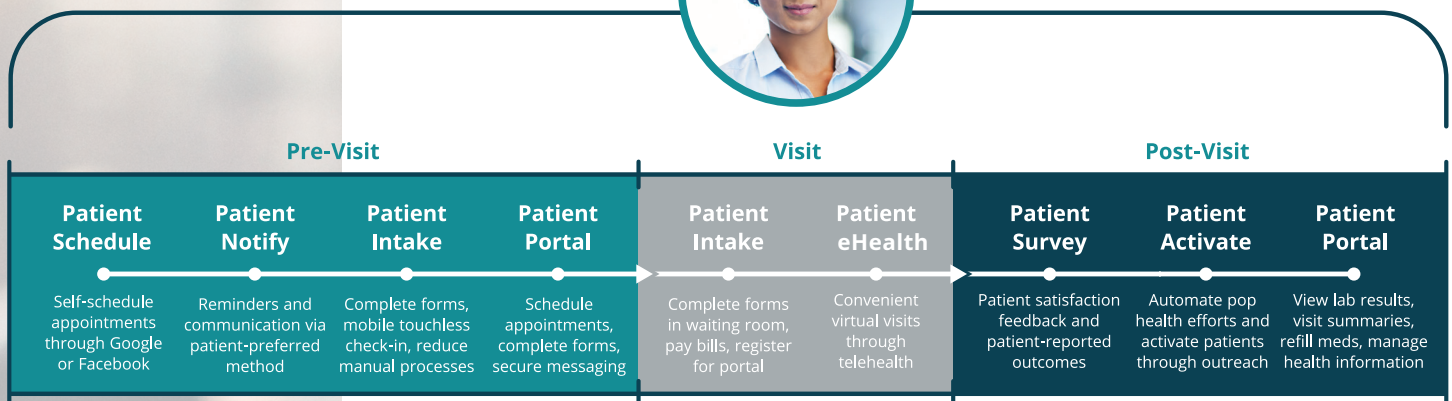

Improved Healthcare Brand

An organization's patient portal is a direct reflection on their brand. The aesthetics, usability and overall experience define each patient's perception of your practice. It's more important today than ever to deliver a patient portal that complements your hard work and boosts your healthcare brand.

Simple Automated Portal Migration

The thought of switching portals can strike fear in the heart of your staff. But fear not. IntelliChart painlessly migrates your already-registered patients to our portal and makes data transfer seamless to your organization and patients.

The Patient Journey

Each Healthy Outcomes solution establishes a touchpoint in the patient journey before, during and after the provider visit.

What Patients and Providers Say

I like the flexibility of scheduling my own in-office or virtual appointment.

Life is easier when I can manage my family's accounts all in the same place.

It's convenient that I can access all my intake forms, reminders and surveys right in my portal.

Day or night, I can see lab results and request medication refills.

Paying my bill is fast and easy, even when I'm on the run.

Patients are pleased they can access records from all their providers in one convenient location.

Automated workflows make our office more efficient - manual efforts are a thing of the past.

Now patients have all the information they need to better manage their health.

Automating our portal enrollment has increased staff efficiency and portal adoption.

We've strengthened our brand in the market by offering our patients a premium portal.
